PROJECTS

Appwrite-Blog
Blog Website | September 2024 | HTML, CSS, JavaScript, React, Redux, Tailwind, Appwrite
- appwriteblog is a fully responsive and interactive blogging platform designed to provide users with a seamless reading and writing experience. The website allows users to create, edit, and publish blog posts on various topics, share them with a broad audience, and interact with other blog posts through comments and likes. With a sleek design and intuitive navigation, appwriteblog aims to foster a community of writers and readers by offering personalized recommendations, social sharing features, and a rich text editor for authors.

Fullstack-Chat-App
Chat App | December 2024 | React.js, Node.js, Express.js, MongoDB, Socket.io
- This Full Stack Chat Application enables real-time messaging with user authentication. Built with React, Node.js, Express, and Socket.IO, it provides a responsive interface and seamless communication. Deployed on Render, it showcases robust full-stack development by combining a dynamic frontend, secure backend, and real-time WebSocket technology for an interactive chat experience.

MERN-Ecommerce
Ecommerce Platform | January 2025 | React.js, Node.js, Express.js, MongoDB
- A modern MERN stack e-commerce platform offering seamless shopping experiences. Features include user authentication, secure payments, product browsing, and an intuitive cart system. Built with MongoDB, Express.js, React, and Node.js, it ensures high performance and scalability for businesses aiming to thrive in the digital marketplace.

Linkedin-Clone
Job Portal Website | February 2025 | React.js, Node.js, Express.js, MongoDB
- It is a full-stack LinkedIn clone built using the MERN stack (MongoDB, Express.js, React.js, Node.js). It features user authentication, post creation, likes, and a dynamic news feed. The frontend is built with React and styled using CSS, while the backend uses Express and Node.js to handle RESTful APIs. MongoDB is used for storing user data, posts, and comments. Firebase is integrated for user authentication. The application provides a responsive UI and mimics the core functionalities of LinkedIn, offering a real-world social media experience for practice and learning.
